Personal Portfolio

REDHA ALTURAIK
202323010

Built with HTML, CSS, JavaScript

Introduction

Overview

- A personal portfolio website showcasing my skills and projects
- Built as a complete web application with interactive features

Objective

- Apply all course concepts in in creating personal portfolio
- Create a professional and responsive portfolio

Motivation

- To build a real-world portfolio
- To showcase my technical and problem-solving skills

LIVE DEMONSTRATION OF KEY FEATURES

Technical Demonstration

Key Features:

- Dynamic project rendering
- GitHub API integration
- Live search and filtering
- Sorting and level-based filtering
- Dark mode
- Contact form with validation
- Visitor timer and username storage

Technical Architecture

Frontend: HTML, CSS, JavaScript
Data Sources:
- Local project data
- GitHub API

State Management:
- Local Storage

Structure:
- Index.html
- Style.css
- Script.js

AI Integration

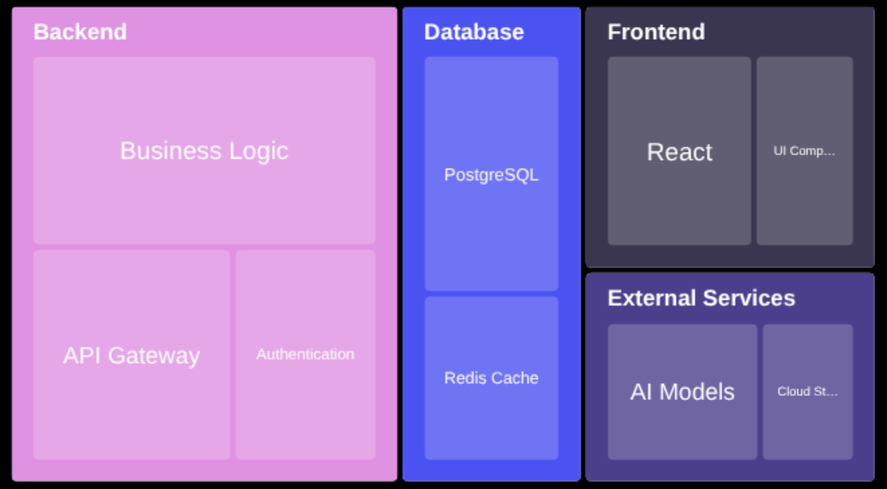
Tools used:

ChatGPT

How AI was used :

Helped implement API integration
Assisted with filtering and sorting logic
Helped debug and improve code
Supported documentation writing

TECHNICAL DEEP DIVE



Source: AI-generated data. Replace or verify before use.

Challenges solved:

GitHub API integration and async data handling
Implementing advanced filtering and sorting
Managing state using localStorage
Optimizing search with debouncing

Unresolved / feature work

Adding more advanced UI features
Enhancing animations

Innovation

- Combined local + API project data
- Implemented multiple filters and search together
- Used debouncing for performance optimization

Lessons learned

- Improved JavaScript problem-solving skills
- Learned API integration using async/await
- Better understanding of DOM manipulation
- Experience with performance optimization

CONCLUSION

Achievements

- Built a complete, functional web application
- Implemented advanced interactive features
- Created a professional portfolio

Future Improvements

- Add more projects
- Improve UI/UX design
- Add new interactive features

Thank **You**
